

Javascript doplnění

1 Externí reference na javascript

```
<script src="https://www.w3schools.com/js/myScript1.js"></script>
```

2 Možnosti zobrazení JavaScriptu

JavaScript může „zobrazovat“ data různými způsoby:

- Zápis do prvku HTML pomocí `innerHTML`.
- Zápis do HTML výstupu pomocí `document.write()`.
- Zápis do výstražné schránky pomocí `window.alert()`.
- Zápis do konzole prohlížeče pomocí `console.log()`.

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

```
<h1>My First Web Page</h1>
```

```
<p>My First Paragraph</p>
```

```
<p id="demo"></p>
```

```
<script>
```

```
document.getElementById("demo").innerHTML = 5 + 6;
```

```
</script>
```

```
</body>
```

```
</html>
```

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

```
<h1>My First Web Page</h1>
```

```
<p>My first paragraph.</p>
```

```
<script>  
document.write(5 + 6);  
</script>
```

```
</body>  
</html>
```

```
<!DOCTYPE html>  
<html>  
<body>
```

```
<h1>My First Web Page</h1>  
<p>My first paragraph.</p>
```

```
<button type="button" onclick="document.write(5 + 6)">Try it</button>
```

```
</body>  
</html>
```

```
<!DOCTYPE html>  
<html>  
<body>
```

```
<h1>My First Web Page</h1>  
<p>My first paragraph.</p>
```

```
<script>  
window.alert(5 + 6);  
</script>
```

```
</body>  
</html>
```

```
<!DOCTYPE html>  
<html>  
<body>
```

```
<script>  
console.log(5 + 6);  
</script>
```

```
</body>  
</html>
```

2.1 Změna HTML obsahu

https://www.w3schools.com/js/tryit.asp?filename=tryjs_intro_inner_html

```
<!DOCTYPE html>  
  
<html>  
  
<body>  
  
<h2>What Can JavaScript Do?</h2>  
  
<p id="demo">JavaScript can change HTML content.</p>  
  
<button type="button" onclick='document.getElementById("demo").innerHTML = "Hello  
JavaScript!'">Click Me!</button>  
  
</body>  
  
</html>
```

2.2 Změna HTML hodnoty atributu

Zdroj: https://www.w3schools.com/js/tryit.asp?filename=tryjs_intro_lightbulb

```
<!DOCTYPE html>  
  
<html>  
  
<body>  
  
  
  
  
  
  
  
  
  
<h2>What Can JavaScript Do?</h2>  
  
  
  
  
  
  
  
  
  
<p>JavaScript can change HTML attribute values.</p>  
  
  
  
  
  
  
  
  
  
<p>In this case JavaScript changes the value of the src (source) attribute of an image.</p>
```

```
<button onclick="document.getElementById('myImage').src='pic_bulbon.gif'">Turn on the light</button>
```

```

```

```
<button onclick="document.getElementById('myImage').src='pic_bulboff.gif'">Turn off the light</button>
```

```
</body>
```

```
</html>
```

2.3 JavaScript skryje HTML Elements

```
document.getElementById("demo").style.display = "none";
```

https://www.w3schools.com/js/tryit.asp?filename=tryjs_intro_hide

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

```
<h2>What Can JavaScript Do?</h2>
```

```
<p id="demo">JavaScript can hide HTML elements.</p>
```

```
<button type="button"
onclick="document.getElementById('demo').style.display='none'">Click Me!</button>
```

```
</body>
```

```
</html>
```

2.4 JavaScript Can zobrazí HTML Elements

```
document.getElementById("demo").style.display = "block";
```

https://www.w3schools.com/js/tryit.asp?filename=tryjs_intro_show

```
<!DOCTYPE html>
```

```
<html>
```

```
<body>
```

```
<h2>What Can JavaScript Do?</h2>
```

```
<p>JavaScript can show hidden HTML elements.</p>
```

```
<p id="demo" style="display:none">Hello JavaScript!</p>
```

```
<button type="button"
onclick="document.getElementById('demo').style.display='block'">Click Me!</button>
```

```
</body>
```

```
</html>
```

3 Klíčová slova

Keyword	Description
break	Terminates a switch or a loop
continue	Jumps out of a loop and starts at the top
debugger	Stops the execution of JavaScript, and calls (if available) the debugging function
do ... while	Executes a block of statements, and repeats the block, while a condition is true
for	Marks a block of statements to be executed, as long as a condition is true
function	Declares a function
if ... else	Marks a block of statements to be executed, depending on a condition
return	Exits a function
switch	Marks a block of statements to be executed, depending on different cases
try ... catch	Implements error handling to a block of statements
var	Declares a variable

4 Proměnné

```
var x, y, z;    // How to declare variables
```

```
x = 5; y = 6;  // How to assign values
```

```
z = x + y;     // How to compute values
```

5 Deklarace více proměnných v jednom var

```
var person = "John Doe", carName = "Volvo", price = 200;
```

6 Spojení řetězců

```
"John" + " " + "Doe"
```

7 Komentáře

Kód za dvojími lomítky `//` nebo mezi nimi `/*` a `*/` je považován za **komentář**.

```
var x = 5; // I will be executed
```

```
// var x = 6; I will NOT be executed
```

8 Operátory

Operator	Description
+	Addition
-	Subtraction
*	Multiplication
**	Exponentiation (ES2016)
/	Division
%	Modulus (Division Remainder)
++	Increment
--	Decrement

9 Operátory porovnání JavaScriptu

Operator	Description
==	equal to
===	equal value and equal type
!=	not equal
!==	not equal value or not equal type
>	greater than
<	less than
>=	greater than or equal to
<=	less than or equal to
?	ternary operator

10 Logické operátory

Operator	Description
&&	logical and
	logical or
!	logical not

11 JavaScript Data Types

```
var length = 16;           // Number
var lastName = "Johnson";  // String
var x = {firstName:"John", lastName:"Doe"}; // Object
```

12 Funkce

```
function myFunction(p1, p2) {  
  return p1 * p2; // The function returns the product of p1 and p2  
}
```

```
function toCelsius(fahrenheit) {  
  return (5/9) * (fahrenheit-32);  
}  
document.getElementById("demo").innerHTML = toCelsius(77);
```

parametry

```
function toCelsius(fahrenheit) {  
  return (5/9) * (fahrenheit-32);  
}  
document.getElementById("demo").innerHTML = toCelsius;
```
